

XPIENT Solutions™ is an organization of highly qualified restaurant and software development specialists devoted to business process improvement and professional support services for the foodservice industry. XPIENT offers a full complement of integrated technologies including Point-of-Sale, Back Office and Enterprise Management. From applications that help you efficiently take orders and improve kitchen throughput, to labor management, production prep, inventory control, customer loyalty, speed of service, surveillance enhancement and data management tools, XPIENT's solutions suite allows the restaurant operator to better and more easily manage every aspect of their restaurant operations.

Solution Offerings

XPIENT is considered a leading provider of innovative, results-driven technology. These solutions are supported by a full range of Professional Services and backed

Products Include:

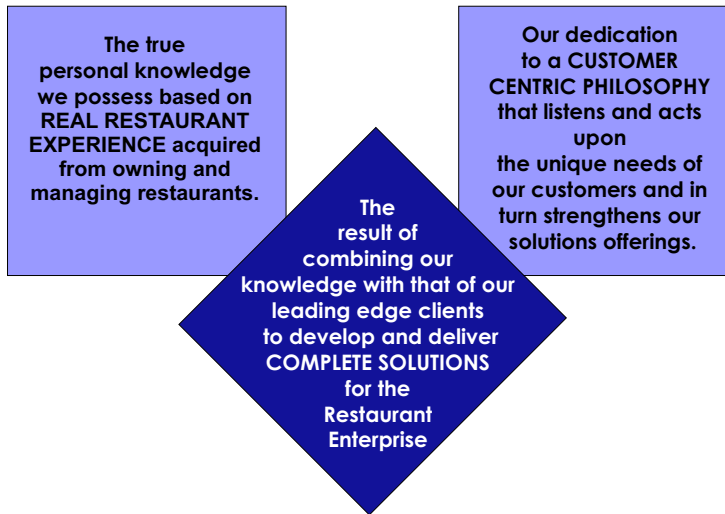

IRIS Intelligent Restaurant Information System	Affordable, easy to use Point-of-Sale application. Infinitely flexible and easily adaptable.
EDM™ Enterprise Data Manager	A powerful tool for synchronization of data between a central database and store locations.
XBMS: Real-Time Alerts™ Exception Based Monitoring System	Continuous monitoring of business events and notification of potential problem conditions.
Visual Dashboard™	Knowledge based management tool for real-time monitoring of key business indicators.
DriveTime™	Eliminates proprietary Speed-of-Service hardware while fully integrating loop detectors with Visual Dashboard, Real-Time Alerts and the Point-of-Sale application to dramatically improve speed-of-service measurement.
SecureAlerts™	Seamless capture and overlay of digital video recording with each Point-of-Sale transaction. Ability to issue Alerts notifying of business rules violations in real-time while indexing video to the alerted event.
LaborPro.NET™	Web based labor-scheduling tool to better manage labor needs.
eIntelligence™	Web reporting tool to view and compare actionable store level data.
Rewards	Develop programs to establish one-to-one customer relationships and loyalty,
eSign™	Order Confirmation, video receipt and digital signage. Dynamic presentation gives power to your message.
eKitchen™	Browser based implementation to extend the use of your Kitchen Display System for other store applications.

For Quick Service, Line Service, Family Dining and Fast Casual concepts, XPIENT Solutions continues to prove - **There's a New Way...**

Embodied in three fundamental characteristics of our company, the value of XPIENT Solutions can be found in:

Professional and Managed Services

XPIENT maintains the expertise required to achieve successful implementation and rollout of a store system solution. Industry experts and technical specialists collaborate with clients to develop a solid understanding of requirements. The focus of XPIENT's Professional Services is to deliver rapid return on investment and exceptional long-term business value. Services provided include hardware staging, installation, training, development, and project management. XPIENT's competency in providing ongoing Managed Services is built on solid experience and a commitment to excellence that ensures clients obtain and maintain their business objectives. Software and hardware maintenance, backed by 24/7 Help Desk availability strives to assure our clients uninterrupted operations.

Open Architecture and Industry Standards

In addition to seamless integration across all of its product offerings, solutions by xpi^{ent} can be integrated into any application using a conventional ODBC or OLE DB database. Existing interfaces provide support for many credit card processing services, third party products including kitchen display systems and gift cards, and back office systems. XPIENT's solutions are hardware independent with many POS platforms currently certified. XPIENT is an authorized hardware reseller for NCR, IBM and FlyTech.

The Power of e

Utilizing the best in web-based technology, XPIENT's solutions are engineered using the Microsoft .NET platform and industry standards including XML. Applications communicate and share data over the Internet regardless of operating system, device, or programming language - allowing access anytime, anywhere.
