Uniwell SX-805

Color Screen POS Hospitality System

The Uniwell SX-805 terminal provides an innovative and cost effective POS solution for the hospitality market. Based on Uniwell's proven hospitality firmware the SX-800 system is readily adaptable to match the operational requirements of Quick Service Restaurants, Casual Dining Restaurants, Lounges, and Hotels.

The SX-805 was designed for maximum speed and ease of use with a 16 line, backlit, color LCD display and a fully programmable 156-position keyboard. A choice of direct-connect or remote receipt printers is available. These features provide employ- with an intuitive, user-friendly interface to popup input screens, full transaction detailed views, and fast, easy to read receipts.

The scroll and select display function simplifies correction of errors and provides the ability to review previous transactions.

Each terminal comes standard with Inter-Register Communication for up to 32 Terminals and 8 Remote printers as well as 2 RS232 ports for PC and direct connect serial printer.

The SX-805 is also available with a monochrome screen as the model SX-700.

Benefits

Menu Keys

Up to 156 individual keys can be set-up to display lists of up to 40 like items for selection. Keys can be set-up for appetizers, soups, salads, entrees, desserts, and beverages for example. Each item in the list can also be linked to 5 preparation groups. The set menu function is available for fixed price meals with a choice of up to 5 courses.

Intelligent prompting

Intelligent prompting for cooking instructions, condiments, and side items lead employees through each item registration. This feature simplifies training and ensures accurate order entry.

Kitchen Control

Automatic transmission of food and drink orders with preparation instructions goes to any combination of 8 kitchen or dispensing areas and is instantaneous. Automatic backup and redirecting of print jobs to remote or internal printers eliminates "lost" orders.

Keyboards and Item Files

Each keyboard contains 156 programmable key positions. 5 Menu levels are available. Each menu level can contain both direct entry keys and Item Look-up keys. Access to any one of 5000 items takes only 2 keystrokes.

Management Control

Full financial, product and employee flash reporting can be displayed on the LCD or printed. Individual employee sales and accountability, electronic journal, auditors report, remote terminal monitoring, and password access to reports and programs provide security and control.

Flexible Order/Guest Check Tracking System

Automatic Order #s, entry of table numbers with multi checks and seat #'s, split checks, transferring checks and "banked" employee accountability help make the SX-800 one of the most easily managed hospitality systems, ever. Automatically displaying a list of each employee's open checks makes recalling previous orders quick and simple.

Price Control

Promotions, special pricing and happy hour pricing can be set to automatically start and stop at pre-selected times during the day. Up to 3 different price levels can be programmed for each item and each price level can be set to automatically start and
