

It's Not Just digital it's better!

There are digital drive-thru communication systems. And then there's Attune™ from Panasonic. Attune incorporates Panasonic's world renowned audio and wireless digital expertise to deliver clear and consistent interactions with your customers and your employees. Available in "All-In-One" or lightweight belt pack models, Attune delivers the advanced features and scalability you need today and tomorrow.

1.9 GHz with DECT eliminates interference

Digital packet diversity for speed teams

Same battery for All-in-One & belt pack

Easy to program and add order takers

Durable construction of all components

Attune Key Features

- Digital Transmission – 1.9 GHz
 - ONLY DECT transmitting devices allowed
 - “licensed communication without the fees”
 - Virtually eliminates interference from non-controlled emitting devices as in ISM license free bands(microwaves, WiFi, telephones, etc)
 - Capable of high and low power modes for extended range communications w/out remote antennas
 - RF Compliant in multiple countries; provides global use
- Two message built in greeter
- Multiple voice prompts (multi-lingual selectable) for order taker functions
- Green product / ROHS Compliant
- 3-levels of Advanced Digital Noise Reduction selectable for site specific noise levels

Manager's Headset

- Control additional functions
- Receive voice prompts
 - Alerts from POS Systems
 - Door triggers
 - Telephone I/F without interfering with other communications
- Talk Lock and Auto Talk Lock options
- One button set up full duplex page lock mode for speed teams.
